

# BODY REPAIR

FIX YOUR FUTURE TO PERFECTION...

MAKING YOUR FUTURE HAPPEN...

## MORE THAN JUST A COURSE

Interested in becoming a panel beater? You have made a great choice. Panel Beaters learn a vast range of skills including fabrication, welding and fitting. Here at the college you will work on a range of projects including from repairing car panels to rebuilding cars. More advanced projects include repairing accident damaged vehicles using sophisticated measuring 'jigging' equipment.

The courses on offer here in the Motor Vehicle department will prepare you for the world of work and give you practical and academic knowledge to progress to industry.

## YOUR UNIQUE EXPERIENCE

- // Undertake exclusive and diverse project repair work on classic cars, modern cars and track cars incorporating traditional and advanced skill sets
- // Experience a realistic working environment working on road going cars
- // Specialist industry visits to the Motor Show, Skills Shows, Science and Industry museum, Race day events and Go-Karting
- // Working with highly skilled industry trained staff using up-to-date equipment and products
- // Strong links with local and high profile employers, Halfords, Wooden canal boat, Speed of Sight and Caterham cars
- // Bespoke technology-led training sessions from industry professionals on a range of new products from Colourtone, Devilbiss, 3M, Farecla, HB Body and Lechler
- // Learn a range of welding skills including the use of MIG, Oxy-acetylene gas, and TIG to enhance your skills
- // Previous students have gained employment with local employers e.g. BMS motor factor
